

Module 1

PRLM Hands-On Activity 1:

Data Files needed for this Activity (see Module 1 files): **mp_index_txt.html**, **mp_menu_txt.html**, **mp_events_txt.html**, **mp_catering_txt.html**, **2 CSS files**, **2 PNG files**, **1 TXT file**

Scenario: Curbside Thai has partnered with another food truck vendor Mobile Panini. Sajja asks you to create a website for the company similar to what you did for his restaurant. The site will have a home page, an online menu, a description of catering opportunities, and a calendar of upcoming events that Mobile Panini will host. A preview of the home page is shown in Figure 1-45.

The page text has already been written for you and style sheets and graphic files have been created. Your job will be to complete this project by writing the HTML markup.

Complete the following:

1. Use your HTML editor to open the **mp_index_txt.html**, **mp_menu.txt.html**, **mp_events_txt.html**, and **mp_catering_txt.html** files from the folder. Enter your name, section and the date in the comment section of each file, and save them as **mp_index.html**, **mp_menu.html**, **mp_events.html**, and **mp_catering.html** respectively.
2. Go to the **mp_index.html** file in your HTML editor. Within the document head, do the following:
 - a. Use the meta element to set the character encoding of the file to utf-8.
 - b. Add the following search keywords to the document: **Italian**, **Mobile**, **food**, and **Charlotte**.
 - c. Set the title of the document to **Mobile Panini**.
 - d. Link the document to the mp_base.css and mp_layout.css style sheet files.

3. Go to the document body and insert a header element containing the following:
 - a. An inline image from the mp_logo.png file with the alternate text **Mobile Panini**. Mark the image as a hypertext link pointing to the mp_index.html file.
 - b. A navigation list containing an unordered list with the following list items: **Home**, **Menu**, **Events**, and **Catering**. Link the items to the mp_index.html, mp_menu.html, mp_events.html, and mp_catering.html files respectively.
4. Below the header element insert an article element. Below the article element, insert a footer element containing the following text:

Mobile Panini * 31 West Avenue, Charlotte NC 28204 * 704-555-2188

where is inserted using the **9832** character code (to replace asterisk) and an extra space is added between NC and **28204** using the **nbsp** character name.
5. Go to the **mp_pages.txt** file in your text editor. This file contains the text content of the four pages in the Mobile Panini website. Copy the text of the Welcome section, which will be used in the home page of the website. Return to **mp_index.html** in your HTML editor and paste the copied text into the article element.
6. Within the article element, do the following:
 - a. Mark the Welcome line as an h1 heading.
 - b. Below the h1 element, insert an inline image containing the mp_photo1.png file with an empty text string for the alternate text.
 - c. Mark the next five paragraphs as paragraphs using the p element. Within the first paragraph, mark the text *Mobile Panini* as strong text. Within the third paragraph mark the text *Curbside Thai* as emphasized text.
 - d. The fourth paragraph contains Mobile Panini's phone number. Mark the phone number as a telephone link and be sure to include the international code in the URL. Note that this number is fictional, so, if you have access to a mobile browser and want to test the link, you might want to replace this number with your phone number.
 - e. The fifth paragraph contains Mobile Panini's e-mail address. Mark the e-mail address as a hypertext link. Once again, note that this e-mail address is fictional, so, if you want to test this link, you will need to replace the Mobile Panini e-mail address with your e-mail address.
7. Save your changes to the file and then open the **mp_index.html** file in your browser. Verify that the layout and appearance of the page resemble that shown in Figure 1-45. If possible, test the telephone links and e-mail links to verify that they open the correct application.
8. Go to the **mp_index.html** file in your HTML editor and copy the *header* and *footer* elements. Include *Created by: Your Name and Last Name – Month and Year* in the footer. Then go to the **mp_menu.html** file in your HTML editor and paste the *header* and *footer* elements into the body element so that this page has the same logo and navigation list and footer used in the home page. Insert an *article* element between the header and footer.
9. Return to the **mp_pages.txt** file in your text editor and copy the contents of the Mobile Panini menu. Then, go to the **mp_menu.html** file in your HTML editor and paste the copied text into the *article* element.
10. Within the article element of the mp_menu.htm file, do the following:
 - a. Mark the text title *Our Menu* as an h1 heading.
 - b. Enclose the menu items in a description list with the name of each menu item marked with the dt element and each menu description marked with the dd element.

11. Save your changes to `mp_menu.html` file. Open the page in your browser and verify that each menu item name appears in a bold font and is separated from the indented item description by a horizontal line.
12. Go to the **`mp_index.html`** file in your HTML editor and copy the header and footer elements. Then, go to the **`mp_events.html`** file in your HTML editor and paste the *header* and *footer* elements into the *body* element. Insert an *article* element between the header and footer.
13. Return to the **`mp_pages.txt`** file in your text editor and copy the list of upcoming events under the Calendar section heading. Then, go to the **`mp_events.html`** file in your HTML editor and paste the copied text into the *article* element.
14. Within the *article* element, do the following:
 - a. Mark the text *Where Are We This Week?* as an *h1* heading.
 - b. Enclose each day's worth of events within a separate *div* (or *division*) element.
 - c. Within each of the seven day divisions, enclose the day and date as an *h1* heading. Enclose the location within a paragraph element. Insert a line break element, `<br />`, directly before the time of the event so that each time interval is displayed on a new line within the paragraph.
15. Save your changes to `mp_events.html` file. Open the page in your browser and verify that each calendar event appears in its own box with the day and date rendered as a heading.
16. Go to the **`mp_index.html`** file in your HTML editor and copy the *header* and *footer* elements. Then, go to the **`mp_catering.html`** file in your HTML editor and paste the header and footer elements into the *body* element. Insert an *article* element between the header and footer and then insert an *aside* element within the article.
17. Directly after the opening tag, insert an *h1* element containing the text Catering.
18. Return to the **`mp_pages.txt`** file in your text editor and copy the text about the mobile kitchen, including the heading. Then, go to the **`mp_catering.html`** file in your HTML editor and paste the copied text into the *aside* element.
19. Within the *article* element, do the following:
 - a. Mark the text *About the Mobile Kitchen* as an *h1* heading.
 - b. Mark the next two paragraphs as paragraphs.
20. Return to the **`mp_pages.txt`** file in your text editor and copy the text describing Mobile Panini's catering opportunities; do not copy the Catering head. Then, go to the **`mp_catering.html`** file in your HTML editor and paste the copied text directly after the *aside* element.
21. Make the following edits to the pasted text:
 - a. Mark the first two paragraphs as paragraphs.
 - b. Enclose the list of the six catering possibilities within an unordered list with each item marked as a list item.
 - c. Mark the concluding paragraph as a paragraph.
22. Save your changes to `mp_catering.html` file. Open the page in your browser and verify that the information about the mobile kitchen appears as a sidebar on the right edge of the article.

23. Return to the **mp_index.html** file in your browser and verify that you can jump from one page to another by clicking the entries in the navigation list at the top of each page.
